

MUSTARD-IMPROVED (TETRALOCULAR)

MUSTARD: 4 FALLI

Sowing Season: Rabi
Maturity Duration: 85-90 Days
Plant Height: Medium
Seed Colour: Yellow

Disease & Pest Tolerance: Good field tolerance under recommended crop management.

Key Advantage: An early-maturing mustard variety, ideal for cultivation after Kharif paddy. Its short duration enables timely harvesting, allowing farmers to sow the next crop without delay while achieving good yield potential.
